Work Experience

Software Engineer – VMC Technologies

06/2024 – present | Bangalore, India

- I am a Full Stack Developer with expertise in AngularJS for front-end development and CodeIgniter 4, Laravel, PHP with MySQL for back-end development.
- I specialize in building dynamic web applications, developing efficient APIs, and managing databases to create robust, scalable solutions.
- My experience includes working with front-end frameworks, back-end server-side logic, and database design to deliver end-to-end application functionality.

Junior Software Developer – Prazo.In

08/2023 – 04/2024 | Bangalore

- Established and executed an innovative strategy to enhance Prazo.In the PG Management System, resulting in a 40% increase in booking efficiency and a 25% boost in customer satisfaction ratings.
- Spearheaded the implementation of a dynamic Dashboard feature, providing real-time insights into PG occupancy, revenue streams, and maintenance schedules.
- Strategically revamped the rent payment module, reducing payment processing time by 20% and improving overall financial transaction efficiency.
- Innovated and enhanced communication between PG administrators and residents for prompt issue resolution and feedback collection.
- Demonstrated strong leadership skills by guiding cross-functional teams and fostering collaboration in a dynamic development environment.

Software Development Intern – Prazo.In

02/2023 – 08/2023 | Bangalore

- Formulated an Internal Tool for CRUD operations and integrated REST APIs.
- Maintained high-quality web applications using Vue.js and JavaScript.
- Refactored legacy code base to the latest standards and versions.

Projects

MCUBE Classic

09/2024 – present

- Managed a classic panel for handling all incoming, outgoing, and callback calls, ensuring seamless operations across multiple channels.
- Oversaw call reporting, tracking key metrics for calls, groups, and employee performance.
- Monitored and managed the assignment of landing numbers based on business needs and customer requirements.
- Led SMS, WhatsApp, and email integrations, facilitating customer communications across various platforms.
- Generated and downloaded detailed reports to analyze and improve team and system performance.
- Managed team activities, ensuring high-quality service delivery and meeting operational targets.

- Collaborated with cross-functional teams to implement system enhancements and troubleshoot issues.

MCUBE MASTER PANEL

08/2024 - 09/2024

- Diagnosed and resolved critical bugs, enhancing the panel's overall performance and reliability.
- Independently managed the MCUBE Master Panel, ensuring smooth operations and timely updates.
- Incorporated user feedback to deliver new features and updates, aligning the project with evolving business needs.
- Streamlined project workflows by optimizing code structure and improving existing functionalities.
- Ensured project consistency by maintaining thorough documentation and delivering technical support post-deployment.
- Worked on REST API development, responsive UI.

MCUBE BIG BASKET

06/2024 - 08/2024

- Designed and implemented a lead management system with role-based access control for Admins, Agents, and Managers.
- Developed a dashboard for lead tracking, including search, filtering, and key metric visualization.
- Created modules for agent and lead management, with features like bulk assignments and status updates.
- Integrated CSV data import for bulk lead uploads with validation.
- Built settings modules to manage cities, departments, and priorities.
- Implemented reporting features for call reports with download capabilities.
- Optimized database queries, improving performance and responsiveness.

Guest Management App for PGs (PG-GuestConnect)

01/2024 -

- Successfully built a comprehensive Guest Management App for Paying Guests (PGs) utilizing the Angular, Ionic, and Capacitor framework.
- This app caters to the specific needs of PG accommodations, providing essential features such as KYC submission, payments using UPI and Razorpay, complaints management, and other necessary functionalities to enhance the overall experience for both guests and PG administrators.

PG Management System

09/2023 -

- Developed and managed a PG (Paying Guest) Management System that handled guest enrollment, room bookings, stay duration tracking, and integrated payment processing, providing a seamless experience for both guests and administrators.
- Managed the entire guest enrollment process, including data collection, validation, and profile creation.
- Enabled guests to book rooms, track booking status, and manage reservations efficiently through an intuitive user interface.
- Implemented stay duration tracking, allowing guests and administrators to monitor how many days a guest has stayed and calculate billing accordingly.
- Integrated Razorpay for seamless online payments, enabling guests to make secure payments for room bookings.
- Monitored bed availability and real-time occupancy, ensuring accurate room allocation and preventing overbooking.
- Provided reports on guest bookings, occupancy rates, and payment transactions to assist in decision-making and resource allocation.

Report Download System using PHP and RabbitMQ

2025-04 - 2025-04

Automated report downloads by developing PHP RabbitMQ consumer scripts scheduled through cron jobs, reducing manual effort and enhancing system reliability.

Education

Bachelor Of Technology - Jawaharlal Nehru Technological University

08/2019 - 05/2023

Certifications

Intern in web development

Received a certificate from internsavy community.
